

Technical Data CLD/TECH/10-13

DIFF-GLASSPRIME

DESCRIPTION:

DIFF-GLASS PRIME is a Two-pack polyamine cured epoxy priming surface tolerant compound incorporating a rust inhibitor and passivator.

APPLICATION:

Ideally suitable for costal atmosphere, Petrochemical plants, fertilizer plants where excellent corrosion protection is required.

CHARACTERISTICS

DIFF-GLASS PRIME is effective on rusted surface where surface preparation can be a minimum. It can be used on water blast cleaned surfaces as well as on surface prepared by abrasive blasting.

SURFACE PREPARATION

Although DIFF-GLASS PRIME can be applied on surface with minimum surface preparation it is always recommended to have clean surface free from oil, rust and any foreign particles. Abrasive

blasting with compressed air to achieve surface Preparation of SA 2^{1/2} or Metal surfaces should be grit blasted to a SSPC-SP5 or NACE #1.

CONDITION FOR APPLICATION

Store all at $(25 \,^{\circ}\text{C})$ to $(30 \,^{\circ}\text{C})$ for 24 hours prior to use. Minimum temperature for installation is 18 $^{\circ}\text{C}$.Do not apply when the relative humidity is greater than 85% or the substrate temperature is less than 3 0C above the dew point.

APPLICATION EQUIPMENT

Suitable Equipment is Airless pump 45:1 or higher, without fluid filters with reverse clean tip. Typical tip size is 0.75 to 0.85mm (30-35 thou) with a 45° fan. The size of tip and fan pattern will

vary with the nature of the work. Pressure to suit hose lengths and working conditions.

 Branch Offices : Chennai, Faridabad, Jamshedpur, Pune, Raipur, Secunderabad, Vadodara.

APPLICATION

For Hand application use Trowel or Specially designed brush to apply a minimum 50 to 75 micron thickness specified ratio and allow to harden. Apply build up or Intermediate coat as soon as primer cost is tack free.

PROPERTIES:

| Hardness | 84 Shore D | |
|----------------------|--------------------|-----------|
| Continuous use temp. | 121 <i>°</i> C. | |
| Adhesive Strength | 3200 p.s.i. | |
| Coverage | 3Sq m per 1kg @100 | micron |
| Potlife | 40 minutes(30℃) | |
| Volume Solid | 60% | |
| Shelf Life | Indefinite | |
| Unit Size | 0.5 Kg | |
| Mixing Ratio | Base | Activator |
| By weight | 7.5 | 2.5 |
| By Volume | 1.5 | 1 |

Clean Up: Clean tools and equipment with recommended solvents, before material begins to set.

Thinner : No thinner is recommended. Use of thinner will harm performance of the product.

Safety : Follow safety standards. Refer Material Safety datasheet.

IMPORTANT:

The information in this brochure is based on data obtained by our own research and is considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data, the results to be obtained from the use thereof, or that any such use will not infringe any patent. The user should confirm suitability of products for his particular purpose.
